

DIGILUX

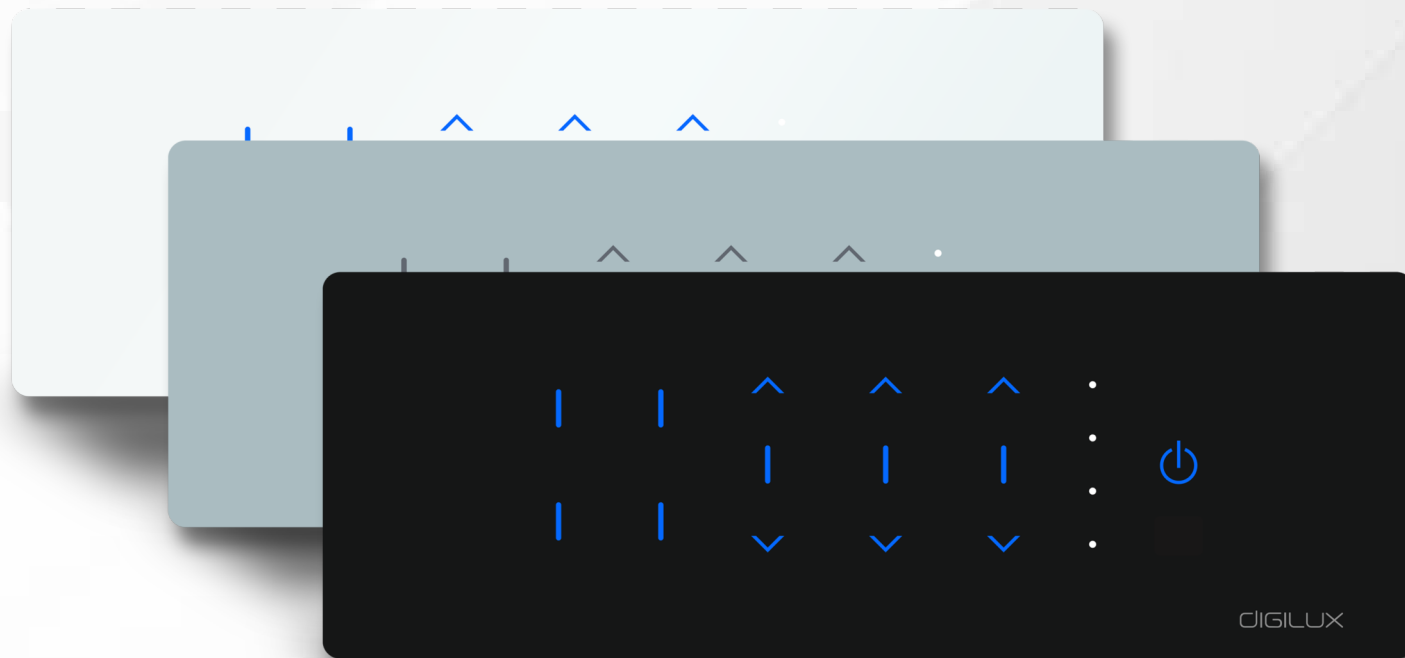

Home Automation Simplified

Crystal Series

- Works without Gateway
- Scenario Control & Time Scheduling
- Supports KNX in Hybrid Model
- Wifi Mesh technology to reduce IP loads on routers.
- BLE support for 16 channel wireless intrusion sensor integration
- Built in IR Controller with learner for HVAC & multimedia controls
- On board memory to store up to 1000 IR commands
- 4 input channels for mechanical two way/wired sensor
- Universal Dimming (Leading / Trailing edge)
- Energy Metering
- 10A-TV3 rated relay for lighting load , one 16A-TV8 rated relay for AC / Geyser Control
- Wide operating voltage range (85-440vac)
- Short Circuit & over voltage Cut off function for load protection with auto diagnosis & notification
- 6kA surge protection

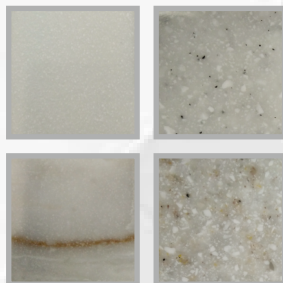

Finely crafted full glass panel from **crystal series** available in various sizes eliminates the need of switch plates

NanoTouch Switches

With NanoTouch Digilux offers a entry level modular and simplified theme of home automation. It eliminates the size restriction making it a true retrofit product with uniform 2 Module size for all types of controls. It is designed to fit with multiple options of switch plates.

Inwall Series

Designed to coexist with conventional switches Digilux brings to you its elaborate Inwall Range.

Our Inwall modules fits behind the traditional switches providing you the same comfort of automation making it more affordable. It also provides the flexibility to upgrade to Touch Switches.

To suit all requirements Digilux Inwall range is made available in 4 variants 2M,4M,6M & 8M sizes.

Digilux Sensors

With transformation towards Artificial Intelligence & IOT it has become increasingly relevant to have a ecosystem where alongwith lighting & media automation we have sensors for intrusion & HVAC applications . Digilux range of sensors is a step in this direction making automation complete. Our range of Sensors are designed to communicate with our Automation Switches.

While our Motion Sensors controls the lights based on movement, our Temperature & Humidity Sensor helps in controlling of Airconditioners based on climatic conditions & other parameters.

Magnetic Door Contacts & Gas Leak Sensors seamlessly connects with our Automation Touch Consoles to secure your home.

Voice Control

Digilux Smart App

Now turn off from anywhere with your smartphone. Digilux systems come with the latest in Android & iOS applications giving you complete control over your home while away or at home.

Digilux is compatible with Alexa & Google Home

Network Controller

At the heart of everything is our Network Controller that is designed to bring complete control at your fingertips right from Lighting & Appliances to your Home Entertainment & Security. A centralized control system that's robust & smart. Seamless integration to third party devices is made possible with our range of products. No matter what technology you have at home, Digilux will synchronize with them like nothing else.

Controls over App, Voice Commands, Preset Scenarios & Time Scheduling are all made possible by our Network controller.
