With pride we introduce to you our first Lithoss Magazine. As we have a lot of news to share we decided to explore the available communication channels to present our newest magazine. As you will read further in this magazine we have been quite busy lately.

On L+B 2010 we introduced our new stand which proven to be a hit. The enthusiasm of the international visitors with regards to our new stand design and our new product line IMMIX has reinforced the belief that diversification and a good collaboration with our partners forms the perfect cocktail for a successful recipe.

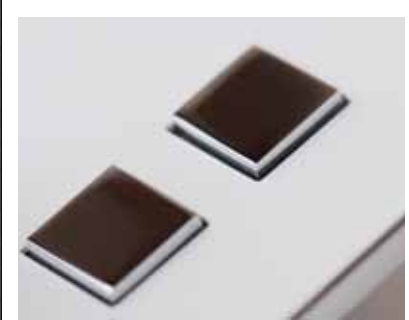

We firmly belief that our new product line will give you the ability to enthuse your customers with their own special yet timeless design.

“IMMIX: Imagine and Mix” is a completely new concept at your disposal!!

New product line: IMMIX

Imagine & Mix

With the introduction of a new product line, Lithoss has decided to create different product groups. The traditional, well known series will from now on be called: SELECT.

Below a word of explanation with regards to our newest introduction: IMMIX.

Immix is the abbreviation of Imagine and Mix. With the IMMIX collection Lithoss offers you design switches adaptable to anyone's liking. Mix any of the existing colours (button, cover plate and frame) and create your own look.

With more than 50.000 different possible combinations your interior can be more personalised than ever!

The combinations are made with the high end finishes existing in the SELECT range. You can choose the finish of your frame and button(s) and mix it with a second finish for the cover plate. Like this the customer can create, in a very easy way, his own design switch. With White and Chrome you can already get a taste of the amazing finishes IMMIX allows you to make.

Brochure 2010

Lithoss proudly presents its new concept catalogue for 2010. It is a combination of high quality conceptual design pictures of both our SELECT and IMMIX range.

The pictures on this page give you an idea of what to expect from our new brochure.

SELECT / bronze

Project in the spotlight : TAL showroom (Ardoonie - Belgium)

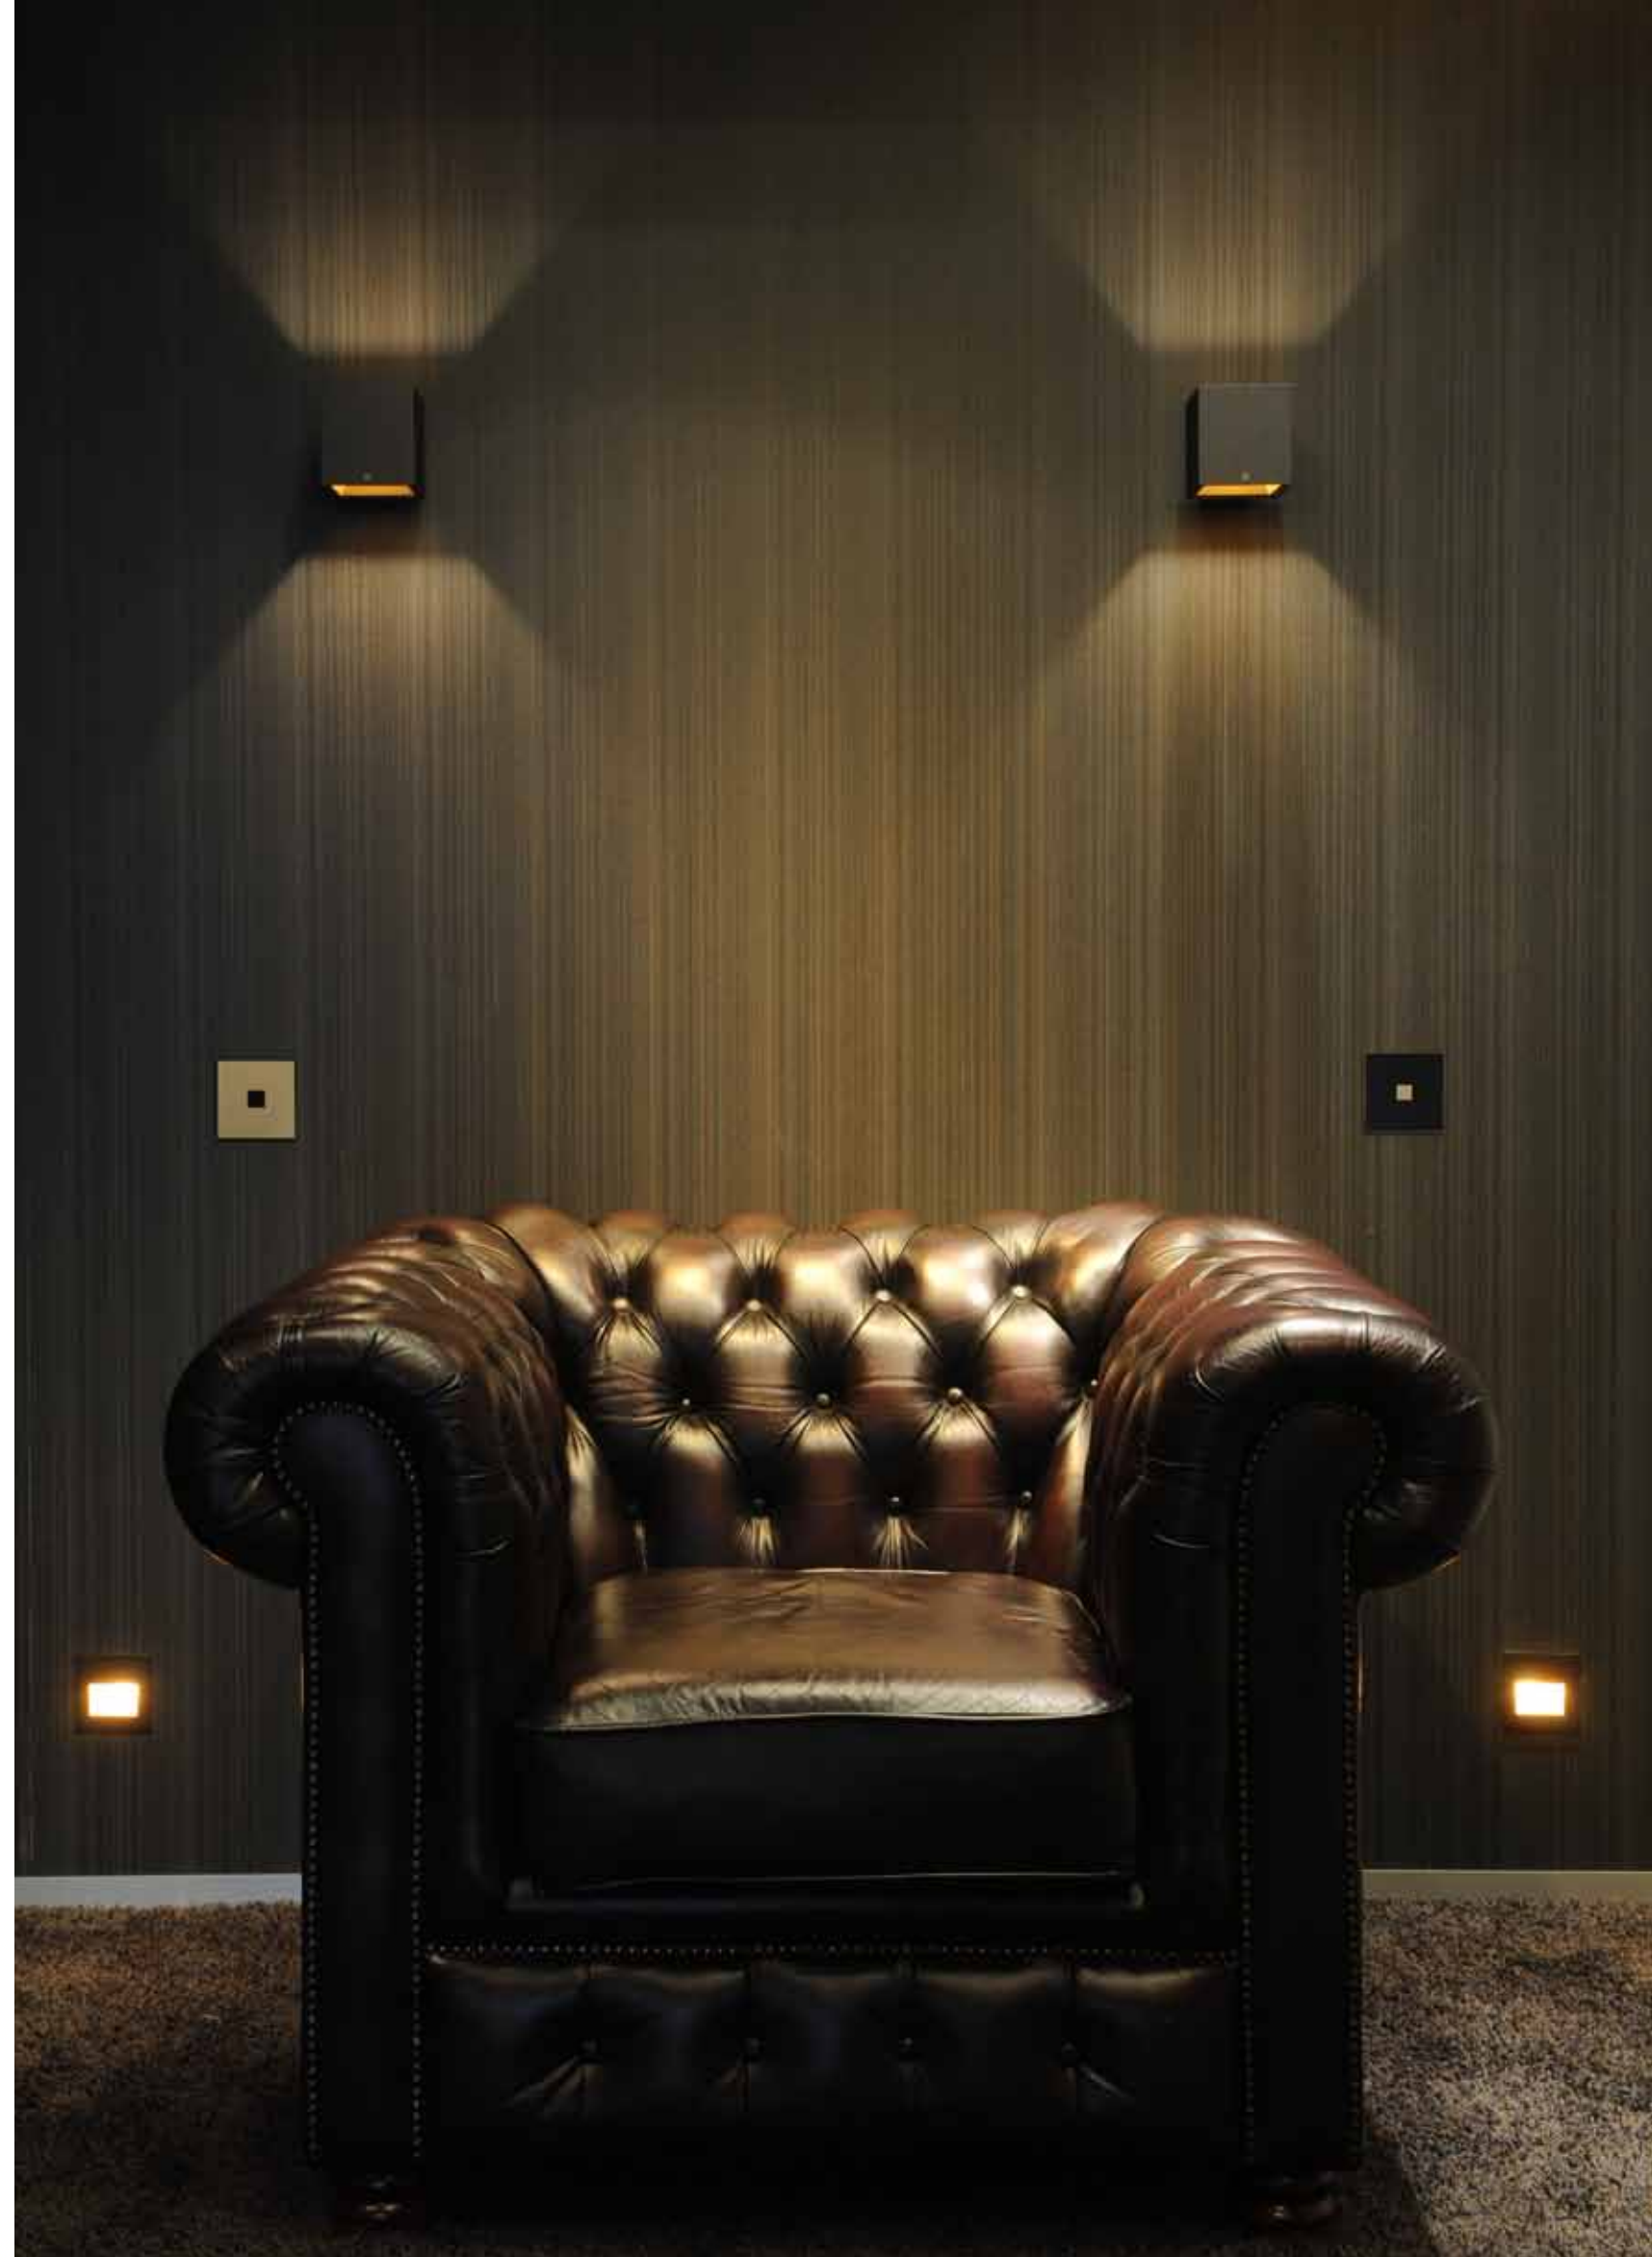

Rarely a design is created that integrates so perfect and minimalistic in any interior as the Lithoss design. The Lithoss design has got the unique characteristic to be in perfect balance with its environment, whether this is a modern or classic interior. The first project in the spotlight, the TAL showroom, is a perfect example.

The Lithoss switches integrate perfectly with the designed lighting. White and Chrome and Black and Gold prove in this case to perfectly blend in with the similarly designed lights!

Get your Lithoss project published!

Lithoss switches are already integrated in a lot of prestigious and nice projects. We would like to bundle these and put in each Lithoss magazine a special project.

Mail us your high resolution pictures and we will publish the best project in this magazine!

Product in the spotlight

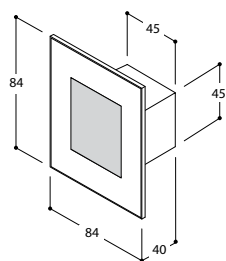

SQLite New LED for orientation lights

Next to the SBQLW and the SQLB orientation lights, the SQLite completes this range. The SQLite has got 9 LED's that lit up. The difference with the SBQLW and the SBQLB is that the light is spread through the different LED's shining through an opaque cover and at the edges with a plastic frame.

Advantages :

- Less than 1 Watt consumption!!
- Immediately connectable onto the electricity circuit
- The SQLite fits in any wall box
- Very easy to install
- Edges that light up
- Fluorescent
- Dimmed night light
- The SQLite is available in all different Lithoss finishes
- Matches the Lithoss design switches

Dimensions :

The SQLite is available in all our standard finishings.

SQLite Stainless steel - cold white LED

SQLite Stainless steel - warm white LED

SQLite Chrome - cold white LED

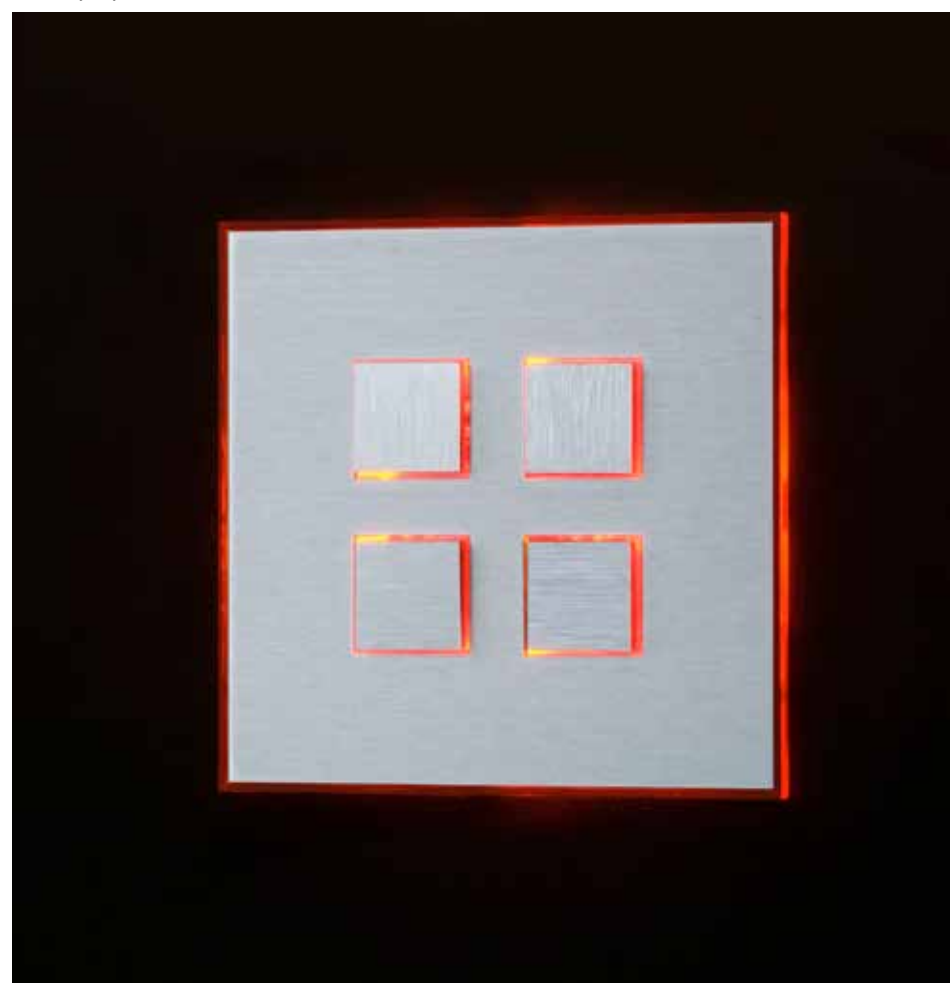

Preview: Third product line 'ILLUME'

ILLUME : bring your vivid imagination to light

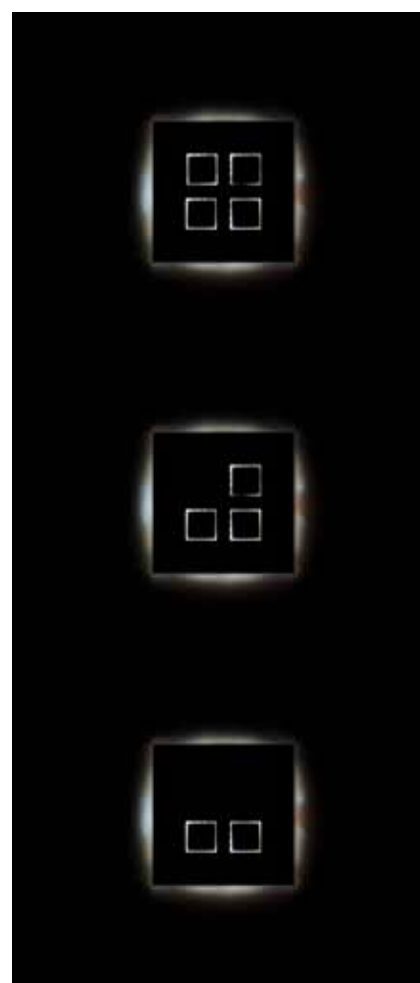

Lithoss enlightens your life with the lit-up switches of the ILLUME collection. Thanks to its subtle light this switch becomes a light in the dark! Enjoy a lovely evening with your switch becoming your orientation light!

Launch June 2010: more information will follow!
